Clinical Program requirements

ACEMAPP ASSURE

Getting started- NEW students

ACEMAPP ASSURE

You will be provided an activation email that expires within 7 days.

- DU student email account
- please check your SPAM folder

You must accept the invitation and confirm your email.

Begin creating your profile.

Begin the process to upload all required documentation into the **ASSURE** access of Acemapp.

DU BSN Health Screening

- This is a 1 page form accessed in Blackboard
  - Organizations:
  - Nursing News
  - BSN Nursing Program Requirements- Clinical Compliance

Form to be signed by your **Healthcare Provider** to determine you are able to participate within the Davenport University clinical opportunities.

Professional Standards Form

- This is a 2 page form accessed in Blackboard
  - Organizations:
  - Nursing News
  - BSN Nursing Program Requirements- Clinical Compliance

Form to be signed by **you** [the Student] confirming that you shared this with your Healthcare Provider and you acknowledge the requirements for participation in clinical.

Basic Life Support for Healthcare Providers

Basic life support (BLS) training reinforces healthcare professionals' understanding of the importance of early CPR and defibrillation, performing CPR, choking relief, using an AED, and the role of each link in the Chain of Survival. [DO NOT TAKE A First Aid HEARTSAVER COURSE]

Criteria:

- This must be completed with **American Heart Association 2025 Guidelines**.
- This must include **infant through adult** age groups.
- This must include an **inseat/ hands-on skills** demonstration/ testing.
- This is a 2 year recertification requirement.
- A local resource for a course in Grand Rapids Innovative Medical Education LLC

Immunizations

Measles/Mumps/Rubella- 2 dose series or Laboratory evidence of immunity [Titer]

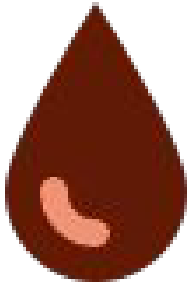

Varicella- 2 dose series or Laboratory evidence of immunity or laboratory confirmation of disease [Titer]

Tetanus/Diphtheria/Pertussis- must be current within the last 10 years [must be the full Tdap- not just a tetanus booster]

Influenza- annual requirement [may apply for annual exemption through Student Access]

COVID- initial series required [may apply for annual exemption through Student Access]

Titers/Blood Tests and/or Skin Tests

Hepatitis B- One time Blood test titer [quantitative anti-HBs] results that verifies 'immunity' to previous infection or vaccines [see PATHWAY for negative titer results follow-up]

Tuberculosis- Annual Skin test or Annual blood test [QuantiFERON TB Gold or T-spot blood test] titer to verify 'no active infection'

- May choose the skin test option [cheaper option if no insurance coverage].
- Initiation to Nursing Program will need 2 tests results within 7-21 days of each other
    - The two-step PPD test is used to detect individuals with past TB infection who now have diminished skin test reactivity. This procedure reduces the likelihood that a boosted reaction is later interpreted as a new infection.

Serum titers are blood tests that measure whether or not you are immune to a given disease(s). More specifically a quantitative serum titer is a titer with a numerical value indicating your actual degree of immunity to a disease(s).

IgG vs. IgM titers – **you need IgG titers**; DO NOT get labs for IgM.

Pathway for Negative Hepatitis B titer

? Is your titer positive?

YES → **✓ You're cleared**
Upload your vaccine record and positive titer to ACEMAPP Assure.

▼ NO — NEGATIVE

3 Start a 2nd vaccine series right away
Ask your provider to complete **Section I** of the Hepatitis B Negative Titer Form: vaccine brand, all dose dates, and your titer result. Then begin the new series using either option in Step 1.

⇢ **OPTIONAL SHORTCUT**
You may re-titer after the **first** new dose. Positive? You're cleared. Negative? Finish the remaining 1–2 doses and go to Step 4.

▼

4 Repeat the titer 6–8 weeks after your last dose
Your provider records the 2nd series and new result in **Section II** of the same form.

▼

? Is your titer positive now?

YES → **✓ You're cleared**
Upload the Negative Titer Form (Sections I & II) to ACEMAPP Assure.

▼ NO — STILL NEGATIVE

5 Finish the non-responder paperwork
- Provider completes **Section III**, confirming two full series with negative titers. Per CDC, no more Hep B vaccine is given.

→ **Requirement met**
Upload the full form (Sections I–III) to ACEMAPP Assure.
